DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- Claims 1-8, 10-13 are rejected under 35 U.S.C. 102(e) as being by Korsunsky
 (US 20030087559A1).

Korsunsky 's device discloses a connector, comprising an isolation frame (2), having a receiving space and an adaptor portion at 44 apart from said receiving space, a terminal set (3) comprising a first circuit board (36), a frame and a second circuit board (32 or 34), for inserting into said receiving space of said isolation frame (2), wherein said first circuit board is set on a surface of said frame, said second circuit board is set on another surface opposite to said first circuit board such that said first and second circuit boards are positioned parallel (see figs. 2-6) to each other with a gap there-between; the first board having a plurality of electronic components, capacitors (3600, resistors (362), an isolation system with the magnetic coil at 31 for filtering included in the magnetic module of the circuit board (36) or see col. 3, paragraph 4); the terminal frame includes a plurality of position elements or connecting terminals such as

Application/Control Number: 10/790,134

Art Unit: 2839

the pins 304a, 304b, 304b' protruding on the surface thereof; the first circuit board having comprising a plurality of holes (at 364) formed the surface for fitting the positioning element of the terminal set, a plurality of adapter terminal set on the frontal side for inserting in the adapter position of the insulation frame (see 21 of fig. 1), the frame backside (62), a socket set at 21 comprising a groove, extended protrusion formed at the distal end (see fig. 1) fitted into the groove, the plurality of terminals; the circuit board comprising the light emitting element or diode (5) attaching at the hole (220) located at the front mating face (200) suitable connecting an RJ adapter such as internet or telephone connection.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Korsunsky (US 20030087559A1) in view of Hyland (US 20020177369A1).

Korsunsky 's device discloses the aforementioned limitations, but fails to explicitly disclose the plug as being RJ suitable for RJ adapter. Hyland's device explicitly disclose the use the RJ plug. It would have obvious to one having ordinary skill in the art at the time the invention was made to use the RJ plug such the one disclosed

in Hyland's device in order to allow Korsunsky 's device to be used in a network communication.

Conclusion

Allowable Subject Matter

5. Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Prior art fails to disclose the resilient buckle into the groove and with the rest of the claim limitations.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean F. Duverne whose telephone number is (571) 272-2091. The examiner can normally be reached on 9:00-7:30, Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, TC Patel can be reached on (571) 272-2098. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
